3 Level 3 of 3 · Advanced Care

Thoughtful, attentive care when needs become more complex.

For loved ones living with advanced dementia, significant mobility challenges, or other conditions that need closer attention and more experienced caregivers.

WHAT'S INCLUDED

Every level builds on the one before it.

LEVEL 1 · INCLUDED

Wellness Care

- Company and conversation
- Meals, housekeeping, laundry
- Errands, rides and outings
- Medication reminders

LEVEL 2 · INCLUDED

Personal Care

- Bathing, dressing, toileting
- Walking and safe transfers
- Help with meals and eating
- Incontinence care

LEVEL 3 · ADDED

Plus support for

- Advanced Alzheimer's disease and other dementias
- More supervision due to confusion or wandering
- Significant mobility limitations
- Parkinson's disease and stroke-related challenges
- More involved personal care and daily routines
- Families navigating changing care needs

WHO IT'S FOR

Advanced Care may be the right fit when:

- Memory loss has reached the point where they shouldn't be left alone
- Confusion, restlessness or wandering is happening, especially later in the day
- Moving, standing or transfers now take more skill to do safely
- Parkinson's or a stroke has changed how they move, eat or communicate
- Personal care routines take longer and need more patience
- The family's plan keeps changing, and you need a team that can keep up

HOW WE APPROACH IT

The right caregiver matters most at this level.

Thoughtfully matched

Experience first

Caregivers are matched to your loved one's needs, with more experienced caregivers for more complex care.

Familiar faces

The same caregivers when we can

With memory loss, a familiar face and voice can make the whole day calmer. We try hard to keep the same people.

Small changes noticed

A note after every visit

Eating less, a new wobble, a harder evening. You hear about it, so you can act early.

Routines that steady the day

Their way of doing things

Meals, bathing and rest at the times they're used to. Familiar routines help on hard days.

The family stays in the loop

Plans that change with them

As needs change, the plan changes with them, without switching agencies or starting over.

Day, night or around the clock

Hourly, overnight, 24-hour

Add overnight care when nights are the risk, or move to 24-hour care when someone needs to be there all the time.

LIVING WITH DEMENTIA AT HOME?

Medicare may pay for respite visits through the GUIDE program.

GUIDE is a Medicare program for people living with dementia at home. Families who meet Medicare's criteria can receive 20 four-hour respite visits a year at no additional cost, plus a dementia care navigator and a 24/7 support line from the program. Caring Companions is an approved GUIDE respite provider in southwest Missouri. Ask us and we'll check eligibility with you.

Advanced Care is still non-medical care, not skilled nursing. Caregivers give medication reminders but don't give medicine or do nursing tasks. Services are based on an individual assessment, caregiver qualifications, and a personalized care plan.

$34 /hour

Includes everything in Wellness Care and Personal Care. A minimum of 4 hours per visit and 8 hours per week.

Best Price Guarantee. For new private-pay clients, we'll beat a comparable written rate from a professional home care agency for your first 6 months. Additional eligibility terms may apply.

Book a free in-home assessment

We come to the home, meet your loved one, and tell you honestly which level fits. No cost and no obligation.
